

Devices for Learning @ KEVIGS

The use of technology and digital literacy skills continue to increase in importance for both higher education and young people entering the workplace. The recent announcements from the DfE and Major exam boards about digital exam components for GCSE and A levels as early as 2026 further drive the needs for schools to support students in the use of technology for learning. At KEVIGS, we have continued to increase our use of technology in the classroom, if you are looking to invest in a device for your child, we recommend ensuring they meet the specification below:

Microsoft/
Android
devices

9" touchscreen
or larger with
a camera

Keyboard
(external/case)
& stylus

iOS
devices

9.7" touchscreen
or larger with a camera

Keyboard (external/case)
& stylus

external keyboards
(those part of a case)
maximise screen
visibility and act as
protection for
screens

A stylus is useful as
we move toward
using digital exercise
books such as
OneNote in some
areas of school

One off subsidy
(up to £50 amazon
voucher) off the
device price for
eligible students in
Yr 7 or who are new
to the school.
