

Economics KS5 Curriculum Map							
A. Formal Curriculum Key Stage 5							
Core Content & Skills		By the end of key stage FIVE we want all students of Economics to know and do the following things: Have a firm understanding of Current economic theory. An overview of the history of Economic thinking. An ability to look at how Economic theory applied to the real world and the ability to critique its application. In more detail Students will appreciate the contribution of economics to the understanding of the wider economic and social environment ● develop an understanding of a range of concepts and an ability to use those concepts in a variety of different contexts ● use an enquiring, critical and thoughtful approach to the study of economics and develop an ability to think as an economist ● understand that economic behaviour can be studied from a range of perspectives ● develop analytical and quantitative skills, together with qualities and attitudes that will equip them for the challenges, opportunities and responsibilities of adult and working life.					
Prior Knowledge & Skills		Economics is a new subject in KS5, however students can draw on skills learnt in Mathematics and where taken Business Studies, History and Geography. These will include computational skills and the ability to critically analyse sources.					
Future knowledge		The Curriculum in KS5 Economics will prepare students for the following future learning: learn how to analyse data critically; how to think synoptically and critically and formulate balanced arguments. To have a deeper understanding of how the world works
